

PRESENTATION OVERVIEW:

PEOPLE PERFORM – ORGANIZATIONS DON'T!

We've been created to be a successful unit in nature.

Did you know that:

- ✓ Eyes can discern 8 million shades
- ✓ Ears can discern 300,000 tones
- ✓ A cubic inch of bone can withstand a ton force
- ✓ All 600 muscles can pull 25 tons
- ✓ And our brain has immeasurable learning, understanding, creativity & intuitive abilities.

But we're really just a bag of dirt and water that can think.

Our brain is not formed until week 6 or 7 of pregnancy. So our thoughts are not us. Our thoughts make us LESS effective because we organise those thoughts, by adding emotion, to create our reality.

We have accumulated baggage – some good, but a lot not so good! The trouble is that we then use our tainted thoughts to design and create organisations that are not NATURAL entities.

By definition, an organisation is a group of people who get together for a common purpose. These are force fitted structures with processes, procedures, rules, and lots of other adopted characteristics that hinder them from being a successful natural entity in nature.

My *People Perform – Organisations Don't* presentations give participants the knowledge and the tools that enable them to integrate effective individual performance with effective organisation structure – that produces value driven outcomes.

I look forward to being the catalyst with your people to improve personal and organisational effectiveness . Call me to discuss your needs and how we can personalise the session for you.

Regards

Richard Wineberg BBus, MBA
